

District Governor Amy Lorenc Presents...

GOING GREEN!

As the 08-09 Governor's Project

What is Going Green?

Going Green is a District-wide effort to improve our environment and fight the existing threats of pollution, global warming and diminishing natural resources.

How do I help?

As Governor's Project, this cause is a main focus of our District for the 08-09 year. Suggested service projects include cleaning up a park or beach, planting trees and flowers, holding a recycling drive, or "Adopting a Highway." There are tons of ways to get involved, so get out there and help improve our environment!
